

COMMITTEE ON TECHNICAL PROCESSING

CTP Annual Program

March 21, 2019

Theme: Emerging Technical Services:

Enhancing the Discovery of Unique and Digital Collections

Part I: Presentations

- Looking at Digital Collection through Patrons' Eyes: How to Strengthen the Relationship between Public and Technical Service by *Runxiao Zhu* (East Asian Studies Librarian, Oberlin College)
- Providing Access to Rare and Unique Resources: A Collaborative Approach by *Naomi Shiraishi* (Japanese Cataloging Librarian, UC Berkeley)
- A Story of a Korean Vade-mecum at Princeton: From Acquisition to Digitization by *Hyoungbae Lee* (Korean Studies Librarian, Princeton University)

Part II: Lightning Talk and Discussion

- Academia Sinica Digital Humanities Research Platform: visual presentation
- Wrap-up Discussion:
 - What Roles Will the Cataloging/Metadata Librarians Play for DH/DS Projects moderated by *Charlene Chou* (Univ. of Washington)

What Roles Will the Cataloging/Metadata Librarians Play for DH/DS Projects?

- Collaboration Makes Global Digital Libraries Sustainable
 - Open access systems vs. silos
 - Collaboration with diverse stakeholders, esp. for domain-specific knowledge
 - Connect with international frameworks, information hubs, regional centers such as ILLF and DARIAH, etc.
- Quality metadata to enhance the discovery of diverse resources
 - International authority files vs. local authority files
 - Provide quality metadata to expose hidden treasures
 - Follow international standards to make metadata consistent and shareable globally!
- Embracing emerging technology such as linked data
 - Don't Reinvent the Wheel: costly, unsustainable and less impactful
 - Use authoritative and linkable thesauri or international authority files such as VIAF, LCSH, LCGFT, LCDGT, AAT, etc.
